President

To,
The Managing Director,
DNH Power Distribution Company Ltd,
Silvassa- 396230

Subject- Lenient view on the mandatory requirement of Solar Power Generation.

Sir,

We bring to your notice that during the last week of Feb 2020 and first week of March 2020, the DNHPDCL had taken an estranged view against the industrial consumers who failed to initiate proper action to purchase and install the Solar Power generation equipment.

Many of such consumers have complied with the directions of DNHPDCL and placed orders on various suppliers to ensure installation before the closure of this accounting year, i.e. 31st March 2020. However, with the outbreak of pandemic COVID-19, consumers are reluctant to take the supply from corona virus affected Countries/States.

Federation understands the importance of generation of Solar Power to discharge UT's statutory obligation. But, concerns of the industry towards the prevention of COVID- 19 in our area, can also not be ruled out. Therefore, it is in the larger interest of public in general of the area, that industries should not be insisted with coercive action to get the supply of Solar Power equipment and install before the due date.

Federation request that by default, all such consumers, should be given time upto 30th April 2020.

Thanking you
Yours' faithfully,
For Federation of Industries Association, Silvassa

Atul R. Shah
