## Chamber of Commerce and Industry

*In association with Knowledge Partner*

**Online Seminar Series of 8 sessions  
on  
Business Excellence through LEAN Thinking  
Starting Date- Friday, 26<sup>th</sup> June, 2020  
3.30 pm to 5.30 pm IST**

**Dear Sir/ Madam,**

“If other Countries can become Lean & Efficient, why not India?” Countries like Japan, China, Taiwan, Korea, Singapore all have imbibed Lean techniques to grow many-folds in last few decades. In mid 80’s India and China had almost similar GDP, while today China is almost 5 times ahead of India, credit to their relentless efforts, to learn & imbibe Lean Techniques from Japan.

In the current disturbing scenario, most of the world’s large companies are now trying to develop an alternative to China as a major player in their supply chain, be it manufacturing or services. India should look at this as an **“Opportunity in Adversity”** and attract these MNCs by imbibing lean techniques to become more efficient in their journey to be a world class organization in the near future.

Organizations cannot successfully **implement new techniques or processes**, unless the leadership at the top is completely involved in it. That’s where the role of Board of Directors as the top leaders of the organizations becomes very crucial through Lean thinking, which enables them to implement their thoughts and ideas through their management teams, by improving all “Processes” and monitor closely the implementation of the new techniques to improve overall performance of the organization.

Lean Board Leadership is an approach to managing an organization by establishing Vision & Mission towards becoming a world class organization, establishing and enabling atmosphere in the organization for **endless Learning and implementing systems** in the company for **Continuous Improvement practices**, to achieve perfection in every area of their operations, a fact that only can satisfy the every growing demands of large **MNCs**, **keen to establish their supply chain in India**, thanks to our trained technical manpower and relatively cheaper direct labour costs.

**India in past has proven their skills in back office operations, during the Y 2 K**

## **crisis and has established itself as the “Back office of the world”.**

With Covid Crisis looming large in the World, it is the right time for India to **take over the title of “Factory of the world”** from China and also become a **“Leading Player In service sector”**, which is expected to grow post Covid, due to tremendous pressure on bigger organizations to reduce their costs for their survival, exactly similar to what happened during “Outsourcing wave” in first two decades of this century, after 2001 and 2008 Financial Crisis.

**IMC Chamber of Commerce and Industry in association with its knowledge partner MentorMyBoard has designed 8 Online Seminar Series on “Business excellence through Lean Thinking” to help everyone imbibe the best practices of Lean Management in their Organization by critically looking at Hidden Wastes & Losses and grow many-fold with the help of world proven techniques to improve performance, productivity and efficiency.**
