## NOTICE

### **Sub: Installation and Functionalization of Effluent Treatment Plant by the Industries involved in manufacturing of Air Texturised Yarn.**

The Hon'ble Supreme Court had passed an order on 22.02.2017 in the matter of Paryavaran Suraksha Samiti V/s. Union of India (WP (C) No. 375/2012) with the direction that, all the trade effluent generating industrial units running without Effluent Treatment Plant (ETP) shall install Effluent Treatment Plant and make it operational within three months from the date of the order i.e. 22.02.2017 failing which the defaulting industries shall be closed down and their power/water supply shall be disconnected by the Pollution Control Committee.

Pollution Control Committee is regularly monitoring all the trade effluent generating industrial units established in the UT of Dadra Nagar Haveli for identifying environmental compliance status under the Water (Prevention and Control of Pollution) Act, 1974, since May, 2017.

Recently during the monitoring of industrial units it had been identified by the PCC that, there is generation of trade effluent from the industries which are involved in manufacturing of Polyester Air Texturised Yarn from Partially Oriented Yarn (POY) by operating the Air Texturising machines. It was observed that the generated trade effluent from the operation of Air Texturising machines is being discharged into the bore well or surface water bodies causing water pollution by these defaulting industries and there are certain industrial units which are manufacturing Air Texturised Yarn but are having consent for manufacturing of Texturised Yarn only.

Therefore with immediate effect one of such defaulting industry which was identified for discharging trade effluent into the bore well was issued closure directions by disconnecting power/water supply to the unit.

Therefore, in exercise of Section 33-A of Water (Prevention and Control of Pollution) Act, 1974 Pollution Control Committee, Dadra Nagar Haveli hereby direct all industries which are involved in manufacturing of Air Texturised Yarn in the UT of Dadra Nagar Haveli to obtain a valid consent from the PCC for manufacturing of Air Texturised Yarn and to install an efficient Effluent Treatment Plant in their premises to treat the generated trade effluent as per the PCC norms, within 30 days from the date of issue of this notice, failing which Pollution Control Committee will initiate legal action, including

sealing/closure of the defaulting industrial units and disconnection of power supply & water supply to industrial plant without any further notice.

  
Member Secretary,  
Pollution Control Committee,  
Dadra and Nagar Haveli,  
Silvassa.
