

Strict Compliance of Environmental Legislation

Dear Member of the Constituent Associations,

During last three months, Industries of DNH have witnessed many power disconnects on account of alleged non-compliance of environmental legislation.

We all are well aware that USP of this territory has always been environmental friendly industrial growth. In spite of being next door neighbour to Vapi, U.T of DNH has somehow maintained its special feature.

However, there is always scope for improvement. Recent moves of Administration indicates that now we should go a step further forward to comply the provisions very minutely in respect of these laws to save Mother Earth, Water and Air.

Federation and Industries of U.T feel it is their basic duty to protect the environment.

FIA requests members to take these matters seriously. It is awakening call. Message is loud and clear.

Please check conditions attached to the consent to operate critically and comply them in letter and spirit.

In case, you find any of the conditions impractical or not possible to comply immediately, please contact office of your association on any of the following contact to enable the Federation to take collective step to get such conditions properly addressed.

- Mr. Atul Shah , SIA Secretary (+91-9998942960)**
- Dr. Shelke, DNHI, Secretary (+91- 9725023516)**
- Mr. Narendra Trivedi, SIMA Secretary (+91- 9824101174)**

Federation is aware that closing of factory operations is very painful. Federation stands with the affected industries, but, it feels its duty to make alert by giving this awakening call.

Regards,

For Federation Of Industries Association

Narendra Trivedi

General Secretary
